

Bengal Ophthalmic Journal - the journey continues...

The Bengal Ophthalmic Journal is now well established on the web and all issues since 2006 are available online at www.oswb.org/journal. We are considering uploading back issues as an archive and would appreciate your opinion regarding this. As a

beginning, the inaugural issue of the Journal which was released in 1972 has been made available on the journal website. A glance at the index of the first issue is enough to show us the involvement of the founding members in the Journal. The number and variety of articles are proof of the interest the members took in the growth of the infant Journal.

This year the photoquiz has generated much enthusiasm with the submission of a large number of excellent clinical photos. A chance for our readers to challenge their grey cells and see if they can score a perfect 10.

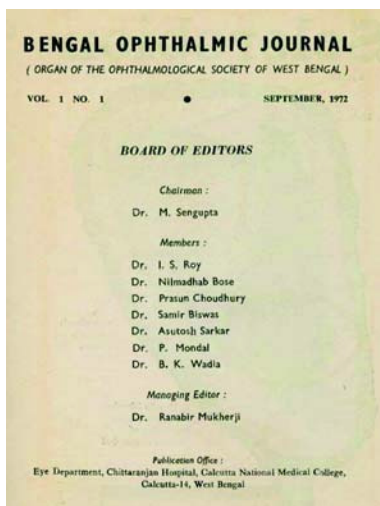

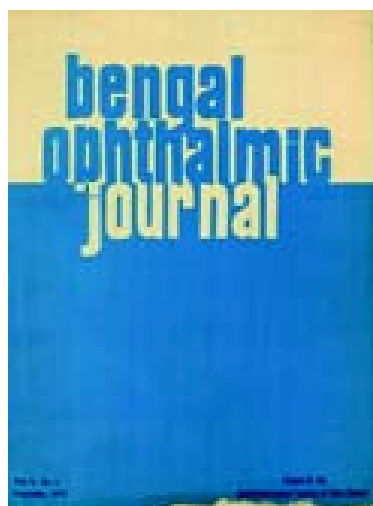

The award winning papers of last year's OSWB Annual Conference have been published as usual, and these along with the original work and interesting case studies published here, are proof of the high standards our Society has achieved academically. I would like to thank all contributors for submitting their work to this journal.

At the end of my 4th year as Editor of The Bengal Ophthalmic Journal, I am reminded of the words of Dr M Sengupta who wrote in the editorial of the first issue "It is hoped that this journal shall be the mouthpiece of not only the ophthalmologists of West Bengal but of the states of Eastern India and also of Bangladesh." I would like to thank once again, all those who have come forward with good original work for publication in this Journal. But we have a long way to go and I would like to take this opportunity to ask each and every member of our Society to enthusiastically submit thought provoking original work to our Society's own Journal, to make our founding Editors' dream a reality.

Paromita Sanatani

Dr Paromita Sanatani

Editor, Bengal Ophthalmic Journal, 2008-2010

CONTENTS

Editorial	1
A study on ocular rigidity	3
--Dr. B. M. Chatterjee	
Benign Interaural Exotropia	13
